THE POWER OF SOUR ON YOUR TEETH.™

Lead the charge against sour candy!

First soda pop. Now sour candy. These popular acidic drinks and candies are taking a toll on patients' teeth through erosion of tooth enamel. A prevalent new trend among young people, sucking and chewing sour candies frequently, or for long periods of time, is of particular concern because the damage can be serious and irreversible.

The Minnesota Dental Association is leading the charge against sour candy. "The Power of Sour on Your Teeth™" is not a pretty picture as these education materials powerfully illustrate. Use these tools to educate your patients about the facts and warning signs of tooth erosion caused by sour candies.

We've made remarkable headway in changing attitudes about soft drink consumption. Equally harmful, sour candy consumption is another silent epidemic. We urge you to participate in this important oral health campaign. Help stop the rising trend of tooth erosion caused by sour candies. Place your order for brochures and posters today.
