

# Healthy Gums, Healthy You.

## Educate your patients.

Growing evidence shows a link between periodontal (gum) disease and other serious medical problems, including heart disease, diabetes, and adverse pregnancy outcomes. With this evidence comes a new campaign from the Minnesota Dental Association: Healthy Gums, Healthy You.

To assist patients in understanding the harmful consequences gum disease can have on their bodies, we've created a low cost tri-fold brochure outlining gum disease and how it is linked to heart disease, diabetes and pregnancy. It also summarizes warning signs of gum disease and, since prevention is key, the brochure

lists objectives to maintain good oral health and avoid the risk of gum disease and other potential systemic conditions.

Minnesota dentists: visit [www.mndental.org](http://www.mndental.org) to view and print two additional flyers conveniently in your office to give to patients.

We urge you to participate in this oral health campaign to help educate patients about the risk of periodontal disease. Place your order today.
