

The Minnesota Dental Foundation (MDF) offers financial support and in-kind services for outreach programs that meet the mission of the MDF by providing dental services to underserved populations, by promoting dental health initiatives, or by supporting dental profession career and volunteer opportunities. The focus is on providing resources that will make lasting improvements in the oral health of Minnesotans and enhance the dental profession in the state.

Each year the MDF Board of Directors reviews applications for grants that fit these criteria. Support for programs and oral health initiatives may change each year based upon issues facing the dental profession, but the core principle of benefiting the underserved remains constant. Since 2001, the Foundation has awarded \$57,298 in grants and/or in-kind services to fund 91 oral health initiatives.

2007 Recipients

In 2007, MDF gave \$14,010 in cash and/or in-kind services to 24 projects. Some of the recipients may have received assistance on more than one project. All of the funded programs help increase access to care for underserved populations or help to build a sustainable oral health workforce in Minnesota.

Give Kids a Smile

The following community clinics received funding and/or in-kind support for the two-day charitable program in February that provides free preventive and restorative dental care to children from low-income families. Grant monies help defray the costs for dental supplies and oral health education materials for the children. In 2007, approximately 5,395 children were seen in 212 community clinics and private dental offices. The value of the services provided was approximately \$1,700,000 by 1,948 volunteers, which included 523 dentists.

American Student Dental Association - University of Minnesota
