***“The Three P’s of Medical Emergencies in the Dental Office:
Preparation, Prevention and Practical Management Tips”***

Dr. Templeton is a Diplomate of the American Board of Oral and Maxillofacial Surgery. He is currently chief of oral surgery and dentistry at the Veteran’s Affairs Medical Center in Minneapolis, Minnesota. He holds the rank of Clinical Professor at the University of Minnesota School of Dentistry. Bruce received his dental training at the University of Manitoba, Canada. He worked as a general dentist in Canada’s far north prior to his oral surgery training at the University of Minnesota. He was in the private practice of oral surgery for eleven years prior to returning to academics. Dr. Templeton has been educating dentists and dental team members for over thirty years.

R. Bruce Templeton, D.M.D.

Program Learning Objectives

- Describe those conditions and situations that can lead to life threatening emergencies in the dental clinic.
- Have ready the components of a basic emergency kit for the dental clinic.
- Treat medical emergencies that may occur in the dental clinics.

Program Synopsis

It is much better to prevent medical emergencies in our clinics than to have to treat them when they occur. We will discuss how to avoid most emergencies and when they do occur, how to handle them in the best way possible to get the optimum resolution for your patients. Life threatening emergencies can occur anywhere at any time to anyone. We all need to be prepared at all times.
