Monday, February 13, 2017

Warehouse Winery

6415 Cambridge Street, Saint Louis Park, Minnesota

5:30 p.m. Social Reception

6:15 p.m. Dinner

7:15 p.m. Program

## *"Know the Warning Signs: Detecting Eating Disorders in your Dental Practice"*

**Dr. Brandenburg**, an adolescent and adult psychiatrist, is the Associate Medical Director for the Center for the Treatment of Eating Disorders at Children's Minnesota. She developed an interest in eating disorders as a medical student at the University of Iowa and fostered that interest with research and clinical work as a psychiatry resident at the University of Minnesota.

**Beth M. Brandenburg, MD**

**Dr. Lesser**, a child, adolescent and adult psychiatrist, is the Medical Director for the Center for the Treatment of Eating Disorders at Children's Minnesota. Dr. Lesser has developed a passion for best practices in implementing leading, evidence-based treatment approaches and tracking outcomes. She has had extensive training in Family-Based Therapy and is the only provider in the state of Minnesota certified in this type of treatment.

**Julie K. Lesser, MD**

### **Program Learning Objectives**

- Describe the signs and symptoms of eating disorders.
- Remove stigma by emphasizing objective diagnosis of eating disorders as a brain disorder.
- Share the critical, life threatening nature of eating disorders.
- Understand the importance of early detection for successful recovery.
- Learn how to make constructive, effective interventions.
- Basic understanding of eating disorder assessment and unique approach to treatment.
- Delivery of evidence-based, full-protocol treatment approaches in better outcomes.
- It is possible to recover fully, and even rapidly, with minimal disruption to normal life.
- How Children's Minnesota sees families as a critical change agent and how our treatment protocols maximize recovery.

### **Program Synopsis**

In the world of dentistry we provide care to patients of all ages. Everyday our patients place their confidence in us to provide the best oral healthcare. Oral health as we know provides clues to an individual's overall physical health. Often, the first signs of a systemic health problem are seen in the oral cavity. This unique opportunity to learn about eating disorders and the new advancements made in correlation with the brain. The signs we see in the oral cavity may lead to the road to recovery for our patients. This program will open your mind to understanding eating disorders, new treatments with recovery success, and why as a member of our patient's health care team can help with earlier detection of a life threatening disorder. We are fortunate to be partnering with Children's Minnesota Center for the Treatment for Eating Disorders to present this unique educational opportunity to our dental community. This information will be of great value to all members of the dental team.

### **Staff Appreciation Night**

*It's time to salute your staff members.  
Let your staff be proud of their doctor(s).*

Bring two or more staff members—  
Everyone receives a free drink!

Drawing for raffle prizes will be held.
