

Dr. Michelle McHale

Updates A General Dentist Should Know About Periodontal & Peri-Implant Diseases

Dr. McHale will cover in her session the updates from the 2017 World Workshop, classifications of periodontal & peri-implant diseases. She will discuss recession, crown lengthening, and an overview of periodontal materials to use.

Dr. Michelle McHale obtained her DDS degree and graduated with High Distinction from the University of Minnesota School of Dentistry in 2012. Dr. McHale completed her periodontal training at the University of Minnesota School of Dentistry's Advanced Education in Periodontics and received her certificate. She also obtained her Master of Science during her periodontal training. Dr. McHale presented her research at the 2016 International Association of Dental Research conference in Seoul, Korea. Dr. McHale has made significant achievements beyond the mandatory educational requirements of the specialty and has earned her certification as a Diplomate of the American Board of Periodontology.

She performs all aspects of periodontal treatment including treatment of periodontal disease, soft and hard tissue grafts, tooth extractions, sinus lifts, and placement of dental implants.
