

Dr. Sally Schuette

Dr. Sally Schuette received her undergraduate and dental education at the University of Minnesota. She practiced public health dentistry before returning to the University of Minnesota to specialize in pediatric dentistry. There, she completed her master's thesis on dental decay in children undergoing bone marrow transplantation. Dr. Schuette is a member of the American Dental Association, American Academy of Pediatric Dentistry, International College of Dentists and National Foundation of Dentistry for the Handicapped. She is also a past president of the Minnesota Academy of Pediatric Dentistry. When not fighting tooth decay in the office, she consults for Children's Hospitals & Clinics and has traveled to provide dental care to HIV-positive children in Romania and Uganda. In addition, Dr. Schuette enjoys gardening, cycling, downhill skiing and playing with her grandchildren!
